March 2011

Schwab Industries Inc completed its training for AS9100 Rev C certification through the MMTC in Plymouth MI. The timeline for transition from ISO9001-2008 to AS9100 Rev C is that documentation of the QMS be compliant with AS9100 Rev C in 2011. Based on the attached transition schedule from the IAQG, the timeline with the registrars and their accredited training program completion, Schwab is planning to conduct certification audit July 2011. Any questions regarding the transition or details of Schwab QMS may be directed to David McInerney-Director of Quality. Schwab is looking forward to a dynamic new QMS and additional diversification of capabilities and opportunities.

Respectfully
David M McInerney
